

Cities Farming for the Future Programme

Bringing Stakeholders Together for Dialogue and Decisions on Urban Agriculture

Multi-stakeholder Processes for Action Planning and Policy Formulation (MPAP) bring together all major stakeholders in a new form of communication and dialogue. This includes:

- Identification of issues and solutions
- Decision-making

- Action planning
- Implementation of pilot projects

Multi-stakeholder teams in RUAF pilot cities are using this approach to develop and adopt a City Strategic Vision and Action Agenda on urban agriculture.

IWMI is the coordinating RUAF centre for Anglophone West Africa
